Teldasoft is a young and dynamic IT company founded in 2007, in response to the growing demand of services in the IT and Telecommunications sector.

Many years of experience gained in the implementation of numerous projects abroad (mainly on the German market) have resulted in winning a rich Know-How in the field of telecommunication and services sector. The knowledge that we gained over the past six years, significantly strengthened our competitive advantage and decided to transfer the proven business models to the ground-down products. The company can boast extensive experience in the design and implementation of systems for the telecommunication market, with concentration on so called *Offline-Billing* solutions.

From the outset, we focus on professionalism and quality of services offered as well as on the best relationship with customers. Our associate partners are fluent in English and German, as in direct contact with customers is particularly important and determines the quality of a future cooperation.

In the beginning, we would like to encourage you to cooperate with our company as well as to familiarize yourself with our interesting products' offer.

## Our products

Our company is a growing software provider offering its solutions both for small and medium-sized enterprises from telecommunication, e-commerce and trade sectors. Our offer is targeted mainly to telecommunication branch; where we specialize in *Clearing and Accounting Systems* (e.g. *Offline-Billing solutions*), as well in systems for controlling and detecting of fraud.

In addition to telecommunication, we deal with ERP and CRM solutions destined for customers from B2B and B2C segments.

We possess our own worked out product architecture called (CWI - *Common Web Interface*) on the basis of which we consequently build, develop and distribute our solutions.

### CWI Features

- AUTHENTICATION SUPPORT
- REMOTE ACCESS SUPPORT
- SSL ENABLED CONNECTION
- EXTERNAL API
- .NET TECHNOLOGY BASED

## convergent solutions for telecommunication, sales and e-commerce

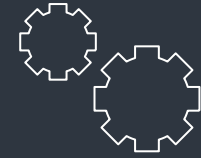

### Teldasoft Common Web Interface (CWI)

Teldasoft Common Web Interface (CWI) stands for an open, HTTPS-based internet gateway to all Teldasoft shipping products. CWI consists of many modules to list only: abstract database interface, data and product layer, which coexist together and may be used independently by all company systems and other components.

The other goal of CWI is to enable user (usually a *B2B* segment party and not only) a fully remote and secured access to a whole system or pre-selected system component.

CWI consists of two important layers:

- Teldasoft ADL (*Abstract Data Layer*) – layer responsible for handling with common CWI data (e.g. *repositories, other business components*), used by e.g. associated Web services or other Third-Party components.
- Teldasoft APL (*Abstract Product Layer*) – layer responsible for handling with Teldasoft product portfolio including “account vs. product” mappings as well user authorization components.

### Technology

On creating our solutions, we use a proven technology of a leading IT vendors (e.g. *database solutions providers, etc.*); in this field we are very flexible.

We rely as well on freeware implementations based on standard GPL license model. To deliver our products, we also use tool mines of such vendors like Oracle or Microsoft. Finally, we rely on a well-known standards concerning software production and delivery.

### References

Teldasoft has a pleasure to participate in many IT projects both in outsourcing model as well directly in a customer headquarter (*on-site*). For this reason, we have numerous references available, directly from such companies like: KOMSA Data & Solutions GmbH, Best Case Management GmbH, BSF Consulting GmbH, Deutsche Telefon und Marketing Services GmbH or Sygnity Sp. z.o.o.

## Our solutions

Our services focus on three primary areas of competences which are: software development, outsourcing and IT consulting. In each of these areas mentioned, we have a wealth of experience, often proven by a numerous references from our clients.

- Software development
  - We are present on the IT market as a reliable partner, offering high-proven credentials and quality of delivered software.
- Outsourcing
  - We provide professional outsourcing services, offering our own resources (hardware as well as software environment including licensed development tools).
- Consulting
  - Consulting belongs to the strong company offer. Our products and services are supported by qualified consultants each having extensive industry knowledge in the fields of telecommunications, e-commerce or sales. We always choose a professional way to treat our customers, still anticipating and responding to their needs.

## Our product portfolio

### Development center

Our development center is located in Germany and is hosted by one of our partners. The software we develop and deliver is fully tested across our development multi-architecture platform (depending on the nature and destination of the application we develop).

### Development standards

The software we develop must be of the best quality and flexibility. To achieve this, we rely on the company worked-out standards as well as on *CMM L2*®.

### Certificates

Our specialists are certified in the Oracle database management (*DBA*) and development.
